

# Appetite for a Change Petition

By signing the petition below I call upon the School Board to recognize the important connection between a healthy diet and clean environment with a student's ability to learn effectively and achieve high standards in school by adopting a policy which will:

- 1 · Remove commercial food advertisements and junk food vending machines from our schools.
- 2 · Convert from foods in schools that are chemically treated, genetically engineered, or irradiated to foods that are organic, transitionally organic, and locally produced. These foods must be made available to all students.
- 3 · Establish a daily vegetarian entree in school lunch menus.
- 4 · Teach students about healthy living and sustainable agriculture through curricula and school gardens.
- 5 · Ban the use of toxic pesticides and toxic cleaning products on school grounds and in school buildings.
